"Heather Knox has to be the hottest new act coming from our Lone Star State. *El Dorado*, the title track to her new cd, is definitely a listener favorite here at KFAN!"

This ain't your mamma's country or your daddy's rock n roll.

Out of nowhere it's nothing but Knox. Heather Knox.

Heather Knox lives by the theory, "life's too short." Quitting her day job and thrusting herself into the music scene has produced a stellar work of artistic expression garnishing praise everywhere it's heard.

El Dorado, the culmination of the last four years of Heather's blood, sweat and tears, is her definitive answer to "alt-country". This album will quickly become a favorite because Heather's sense of musical style and addictive lyrics translate themselves into a true listening experience.

"Her real forte, however, is the slow ones: powerful, dramatic hymns of affirmation like *Broken* or declarations of regret like *Wasted* provide perfect vehicles for Knox's soaring, aching voice."
